

Logging in

- Forgot password? Is not working
- When I type wrong password it does not say that my password is wrong just redirects me to the same log in with the log in and password info for which I checked the box remember me

Post an offer

- All have shirt icons

Finding an offer

- When I posted an offer I wrote additional notes which I cannot see when I am viewing that offer from another account
- When I click View & Book the page opens automatically scrolled down
- The formatting of the icons is not identical

Pricing: \$25/kg (min 1kg)

My items

- When I upload a picture of my item there is no way to delete it if for example I uploaded a wrong picture
- There is nothing stopping me from putting in invalid phone number for example, and there is no country code indication

Chat box

- It is unclear with who I can chat; it says fail when I click on couriers
- When you send anything to the chat it automatically scrolls down which is annoying

My account

- Fails to update any personal information

Failed to update profile

- For verification when I uploaded jpeg it was fine, when I uploaded pdf it failed, is it format specific?
- For verification again when you upload a wrong file there is no way to remove it

Other

- Track your item*

Suggestions

- No way to see what I typed in password; no indicator of a strong password or any password requirements
- When you open the website you are meant to log in, it does not have any information what is this platform, maybe to have the home page first then log in option?
- The pricing is high, when an item is a little heavy it would be better option to ship using any other shipping company
- Maybe when you are finding an offer and click View & Book you have also some initial information about the traveler to gain trust
- When the item is pending, maybe we create a service where for an extra fee their posted item can be reviewed and accepted in an express way.
- When posting an item, I can continue without uploading a picture of it, further when completing it says failed to create an item, I am guessing the reason is no picture uploaded, maybe instead we make that step mandatory like you cannot continue without completing it
- We should not call the travelers couriers
